LOCKS HAVE GOT A LOT SMARTER

At **MD Lock & Key**, our smart locking systems operate as a secure and adaptable alternative to conventional master keys systems for schools, hospitals, factories and public buildings.
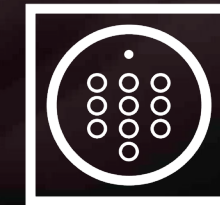

We attach great importance to scaleable solutions, effective security, reliable components, high performance software and simple operation.

Benefit from the adaptability and convenience of keyless access with the latest auto-locking, high security locks.

LOCKING TECHNOLOGY DESIGNED WITH THE USER IN MIND

Smart locks replace mechanical keys with a digital transponder or PIN code keypad

Simons≡Voss

KEY FOB
OPEN DOORS WITH THE PRESS OF A BUTTON

Simons≡Voss

KEY PAD
PROGRAMMABLE 4, 6 OR 8-DIGIT PIN CODES

SMART ACCESS MANAGEMENT

The system is adaptable making changing user access levels quick and simple.

- Manage user access levels for all areas

- Set time restrictions for each user

- Cancel lost or stolen fobs without affecting all users

|	PRODUCTION MANAGER	FINANCIAL CONTROLLER	R&D MANAGER	SALES MANAGER	HEALTH & SAFETY
MAIN ENTRANCE	✓	✓	✓	✓	✓
PRODUCTION AREA	✓		✓		✓
FINANCE DEPARTMENT		✓			
SALES OFFICE	✓			✓	
ADMIN OFFICE	✓	✓	✓		✓

INSTANT CONTROL

Administer locking from the PC based software (no internet required). With a few clicks you can assign access authorisations to specific users, time restrict users and and request an audit trail over all recent activity. Lost or stolen fobs can be removed and new ones issued.

MOBILEKEY

	Nicole	Markus	Tobias	Facility Manager	House Keeper	Spare Transponder	Tobi	Visitor	Graig	Suzan

UNITING DESIGN, FUNCTION & SECURITY

Smart locking systems combine the physical strength and security of mechanical auto-locking locks with the convenience of Smart technology.

All locks conform to European emergency escape regulations **EN179** or **EN1125** allowing unobstructed escape in the event of an emergency.

Premium quality

Manufactured to a high standard in Osterfeld, Germany with 2 year onsite warranty

Fully encrypted

Encrypted radio communication between fobs, keypads and locks via a secured internal network with no need for an internet connection

Durable

Stainless steel finish with IP66 ingress protection rating for use in harsh outdoor environments

Long Life

High level of durability, battery life of 250,000 operations and a life expectancy in excess of 1 million operations

md Lock & Key

ADDED COMFORT & FUNCTIONS

Detailed event log of all recent lock activity

See the date and time each user operated the lock

Record of all instances where access was denied

Export audit trail details to a PDF document

md Lock & Key

CONVENIENT KEYLESS ACCESS

KEY-LESS
No more key management

TIME-BASED
Control when doors are accessible

SINGLE FOB
Use one transponder to access all areas

AUDIT TRAIL
See when doors were unlocked

USER FRIENDLY
Manage using PC software

MULTIPLE USERS
Add people with different access rights
